**Assessment & Plan****Screen for colon cancer**

Will discuss when he return to clinic

**Wound of right lower extremity, subsequent encounter**

Was admitted at the hospital for wound on LE with venous ulcer and lymphedema, currently followed by vascular clinic and wound care,

Pt has been tried leg elevation and wearing compression stocking daily, but his lymphedema has been gradually worsening

He is supposed to move in to Martin Luther ass living at Apple Valley, need to discussed with them about home care on site. If it dropped approval, he will contact us again to use FV home care

**Ulcer of right lower extremity with fat layer exposed (H)**

Mentioned above

**Atrial fibrillation with RVR (H)**

He is currently on coumadin, he might need monitoring and adjusting with our FV EP INR clinic, the referral order is placed. His assisted living facility will needs to communicate with our INR clinic for lab sampling and transferring results if they have capability. Pt acknowledged and relaying the message to his assisted living facility manager

**Acute saddle pulmonary embolism with acute cor pulmonale (H)**

Mentioned above

**MED REC REQUIRED**Post Medication Reconciliation Status: discharge medications reconciled, continue medications without change**BMI:**Estimated body mass index is 40.19 kg/m<sup>2</sup> as calculated from the following:

Constance

HPI

Situation:

Patient is being discharged from **Martin Luther Care Next** week 07/26.

Transitioning to **Apply Valley Villa** is also his new residence also on 07/26.

- who will handle the INR? Patient is on coumadin, is the provider willing to write the orders for the INR.
- Is the provider okay with writing orders for medications and any changes to the home care plans without seeing him first?

**Review of Systems**

Constitutional, HEENT, cardiovascular, pulmonary, GI, GU, musculoskeletal, neuro, skin, endocrine and psych systems are negative, except as otherwise noted.
